## Healthcare Software Experience

Curebase, Inc

- *Software Engineer*

December 2018 – Present

- Developed software and infrastructure to administer distributed clinical trials
  - AWS, RDS (Postgres), Terraform, Javascript (Node, ES6, React), Sass
- Created a Quality Management System to ensure compliance with regulatory standards
  - HIPAA, 21 CFR §11 (FDA electronic record submission), Good Clinical Practice (GCP)
  - Conducted internal audits, wrote quality manual, policies, and standard operating procedures.

AgileMD, Inc

- *Software Engineer, Epic EHR Integration Lead*

February 2018 – June 2018

- Built IE8 compatible modern full stack web applications with unit tests.
  - Node, ES6, React, Mocha, Sass, AWS Aurora (Postgres), MongoDB
- Developed a serverless idempotent data ingestion platform.
  - AWS Lambda, AWS SAM, Python, Node, AWS Aurora (Postgres), MongoDB

Integrated Healthcare Association

- *Full Stack Web Engineer / Generalist*

February 2016 – January 2018

- Built data reporting portal for monitoring physician level progress across multiple large health organizations.
  - Django, React/Redux/Highcharts, Postgres on RDS, Ansible on AWS EC2
  - Data ingestion and report generation using Pandas
- Worked with another developer to create tool for visualizing health quality and cost disparities across California.
  - Flask, React/Alt.js/Highcharts, Pandas, Numpy, Fabric

University of California, Santa Cruz

- *Undergraduate Thesis*

March 2015 – December 2015

- Created a web application that predicts the ideal heparin dosage using existing models.
- Conducted a study to determine the feasibility of using a statistical drug dosing tool in a mock clinical setting.
  - Angular JS, D3.js, Python, Flask, Postgres, SQLAlchemy, Scikit-learn.

Sana, MIT

- *Developer, Lecturer*

February 2014 – October 2014

- Developed the Sana Protocol Builder, a web application that allows clinicians to create medical algorithms that run on community health workers' smartphones in rural and low resource environments.
- Lectured with a group from MIT at Vellore institute of Technology in India about the Sana medical platform, and web application engineering to undergraduates.

## Education

BS, Computer Engineering, BA, Computer Science

Fall 2015

University of California, Santa Cruz

## Awards

Ira and Kate Pohl Computers and Society Award

May 2015

- Ira and Kate Pohl scholarship is to recognize and support outstanding undergraduate students who are committed to using computer science for social good.
