Education

BS, Computer Engineering   Fall 2015
BA, Computer Science
University of California, Santa Cruz

Software Experience

University of California, Santa Cruz
- *Undergraduate Thesis*   Spring 2015 – Fall 2015

- Created a web application that predicts the ideal heparin dosage using existing models.
- Conducted a study to determine the feasibility of using a statistical drug dosing tool in a mock clinical setting.
- Stack: Angular JS, D3.js, Python, Flask, PostgreSQL, SQLAlchemy, Scikit-learn.

Sana, MIT
- *Developer, Educator*   February 2014 – October 2014

- Developed the Sana Protocol Builder, a web application that allows clinicians to create medical algorithms that run on community health workers' smartphones in rural and low resource environments.
- Lectured with a group from MIT at Vellore institute of Technology in India about the Sana medical platform, and web application engineering to undergraduates.

Hardware Experience

Bellus 3D — Los Gatos, CA
- *Consultant*   August 2015 – January 2016

- Developed hardware prototypes for an experimental camera.
- Wrote Python for Raspberry Pi and C for microprocessors.

University of California, Santa Cruz, CA
- *Undergraduate Research Intern*   July 2014 – March 2015

- Designed a prototype of an experimental camera flash with individually controlled high power LEDs.
- Required PCB design and layout using Cadence Allegro.

Side-Projects

Gadcalc

- Developed a gadolinium contrast agent dosage calculator for technicians and medical doctors.
- Built in Angular.js and Bootstrap.

Ethiopian Calendar Pregnancy Wheel

- Developed a pregnancy wheel web app that converts between the Gregorian Calendar and Ethiopian calendar.
- Built using jquery and Bootstrap.

Awards

Ira and Kate Pohl Computers and Society Award   May 2015

- Ira and Kate Pohl scholarship is to recognize and support outstanding undergraduate students who are committed to using computer science for social good.

Awarded Dean's Honors for Fall 2011, Fall 2013, Spring 2014, Winter 2015, Spring 2015
